Journal of Forecasting, Vol. 12, vii–x (1993)

Contents

Volume 12, Issue Nos 1–8
JOURNAL OF FORECASTING

Issue No. 1, January

Analysis of Many Short Time Sequences: Forecast Improvements Achieved by Shrinkage: *J. Ledolter and C.-S. Lee* 1

Forecasting Time Series with Outliers: *C. Chen and L.-M. Liu* 13

Time-series analysis supported by Power Transformations: *V. M. Guerrero* 37

Estimation and Testing of Time-varying Coefficient Regression Models in the Presence of Linear Restrictions: *S. J. Leybourne* 49

Forecast Combination in a Dynamic Setting: *N. E. Coulson and R. P. Robins* 63

Method and Situational Factors in Sales Forecast Accuracy: *R. J. Thomas* 69

Issue No. 2, February

Introduction to the Special Issue on Structuring Knowledge and Aiding Judgment in Forecasting 79

Evaluating the Role Judgment Plays in Forecast Accuracy: *M. R. Donihue* 81

A Predicting System Based on Combining an Adaptive Predictor and a Knowledge Base as Applied to a Blast Furnace: *C. Jian* 93

Causal Forces: Structuring Knowledge for Time-series Extrapolation: *J. S. Armstrong and F. Collopy* 103

Modeling Expert Forecasting Knowledge for Incorporation into Expert Systems: *R. M. Hamm* 117

Indexed or abstracted by 'Anbar Abstracts', 'COREJ', 'Cambridge Sci. Abstracts', 'Current Contents', 'Current Index to Statistics', 'Executive Sciences Inst. Inc.', 'Int. Abst. in Operations Research', 'Management Contents Inc.', 'Public Affairs Info Service', 'Social Sciences Citation Index', 'Sociological Abstracts Inc.', 'Statistical Theory & Method Abstracts', 'VINITI-USSR Acad. of Sciences'.

The Effectiveness of Imprecise Probability Forecasts: *P. G. Benson and K. M. Whitcomb* 139

Thinking About the Future: A Cognitive Perspective: *J. Klayman and P. J. H. Schoemaker* 161

Issue No. 3 & 4, April

Business Cycle Forecasting: *A. H. Westlund* 187

Predicting Turning Points in Business Cycles by Detection of Slope Changes in Leading Composite Index: *D. B. Jun and Y. J. Joo* 197

Forecasting Cyclical Turning Points with an Index of Leading Indicators: a Probabilistic Approach: *N. Nazmi* 215

On Scoring Asymmetric Periodic Probability Models of Turning-point Forecasts: *E. Ghysels* 227

On the Use of Dispersion Measures from NAPM Surveys in Business Cycle Forecasting: *S. Dasgupta and K. Lahiri* 239

Business Survey Data in Forecasting the Output of Swedish and Finnish Metal and Engineering Industries: a Kalman Filter Approach: *M. Rahiala and T. Teräsvirta* 255

The Predictive Value of Production Expectations in Manufacturing Industry: *J. B. Madsen* 273

Composite Forecasts, Non-stationarity and the Role of Survey Information: *S. Holly and S. Tebbutt* 291

Economic Forecasting at High Frequency Intervals: *L. R. Klein and J. Y. Park* 301

Forecasting Quarterly Data Using Monthly Information: *P. Rathjens and R. P. Robins* 321

Interactions of Real GNP Business Cycles in a Three Country Time Series Model: *M. Aoki* 331

Fixed vs Time-varying Transfer Functions for Modelling Business Cycles: *P-O. Edlund and H. T. Søgaard* 345

Forecasting with Generalized Bayesian Vector Autoregressions: *K. R. Kadiyala and S. Karlsson* 365

Issue No. 5, June

Modelling Exchange Rate Dynamics: *D. M. Nachane and D. Ray* 379

Assessing Inefficiency in the S&P 500 Futures Market: *C. H. Farrell and E. A. Olszewski* 395

Forecasting Marginal Costs of a Multiple-output Production Technology: *G. M. Lady and C. E. Moody* 421

Insights or Forecasts? An Evaluation of a Computable General Equilibrium Model of Spain: *C. Polo and F. Sancho* 437

Multiple Time-Series Modelling: Another Look at the Canadian Money and Income Data: *B. Abraham* 449

Issue No. 6, August

Minimum Variance Prediction of Bilinear Time Series: Direct and Adaptive Versions: *E. M. Bielinska* 459

Forecasting the Business Cycle Without Using Minimum Autocorrelation Factors: *K.-G. Löfgren, B. Ranneby and S. Sjöstedt* 481

On Estimation and Prediction Procedures for AR(1) Models with Power Transformation: *J. C. Lee and S. L. Tsao* 499

Linear Regression Forecasting in the Presence of AR(1) Disturbances: *A. Latif and M. L. King* 513

A Bayesian Approach to Modelling Stochastic Cycles: *G. H. Brasil and R. C. Souza* 525

Announcements and Call for Papers 539

Issue No. 7, October

Testing Weak Rationality of Forecasts with Different Time Horizons: *G. Kirchgässner* 541

Diagnostic Tracking and Model Specification in Combined Forecasts of U.K. Inflation: *L. de Menezes and D. W. Bunn* 559

Generalized Exponential Growth Models: A Bayesian Approach: *H. S. Migon and D. Gamerman* 573

Forecast Intervals of Net Migration: The Case of the Netherlands: *J. de Beer* 585

Periodically Integrated Subset Autoregressions for Dutch Industrial Production and Money Stock: *P. H. Franses* 601

Call for Papers 615

Issue No. 8, December

On the Limitations of Comparing Mean Square Forecast Errors: *M. P. Clements and D. F. Hendry* 617

On the Limitations of Comparing Mean Square Forecast Errors: Commentary: *R. T. Baillie, F. X. Diebold, R. F. Engle, N. R. Ericsson, C. W. J. Granger, E. P. Howrey, S. K. McNees, R. A. Meese, P. Newbold, P. Schmidt, K. F. Wallis and K. D. West* 639

On the Limitations of Comparing Mean Square Forecast Errors: A Reply: *M. P. Clements and D. F. Hendry* 669

Disaggregation of Annual Time-series Data to Quarterly Figures: A Comparative Study: *W. Chan* 677
